

vetscan **IMAGYST™**

Digital Cytology Image Transfer

Powered to change the way you get
cytology results

**A single, multipurpose diagnostic platform with
multiple applications:**

- Equine cytology
- AI equine fecal egg count (coming spring 2023)

As new applications become available, they will
be easily integrated with existing capabilities.

In-house access to expert pathologists

Upload digital images of blood,
joint fluid, abdominocentesis, TTW/
BAL, reproductive, urine, FNA
or impression smears from your
in-clinic scanner.

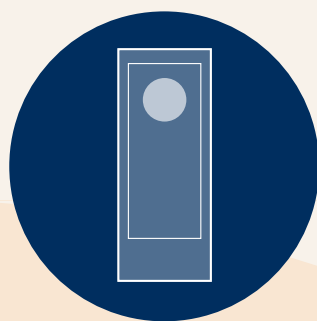

Results available in <2 hours, 24/7

Receive an expert review and
report from a board-certified
clinical pathologist.

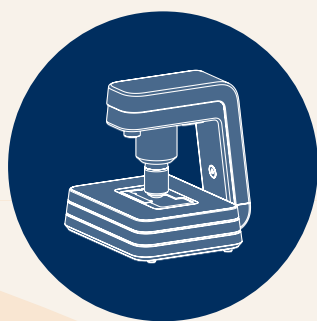

Upload and communicate results

Produces high-quality image
reports that can be uploaded
directly to electronic medical
records and emailed to clients.

**VETSCAN IMAGYST™ delivers convenient digital access to expert clinical
pathologists within the Zoetis network for results in under 2 hours, 24/7.**

**Simple in-clinic
preparation using
traditional methods**

**Small footprint
scanner**

**Analysis by a remote
board-certified
clinical pathologist***

**Expert results
within 2 hours**
